EXPERIENCE

Software developer
01.2020 – present

🏛 Uzbek Commodity Exchange

My main duty in this company is connecting different organizations to exchange data between them.
I have created APIs to exchange trade results and different data between organizations.
Some projects are required to use message broker technologies like RabbitMQ.

Software developer
08.2018 – 12.2019

🏛 Westminster International University in Tashkent

I have integrated Turnitin into Intranet coursework upload system which made checking coursework similarity of 3000 students significantly faster than before.

To calculate KPI of employees automatically I created TaskManagement system which was a widely used tool by 400 workers.

My duties as Moodle and Git administrator were additional valuable contribution to the university.

Electronic and Software developer
12.2013 – 08.2018

🏛 SALTEK LLC

In this company I have developed software for WinCE to control automated laboratory robot to measure cotton humidity. This system is 5 times faster than traditional method and saves assistant's time.

I have written software for RaspberryPi that controls automated moistening machine to rise hardness of thread on lower atmosphere pressure.

Young researcher
10.2009 – 05.2013

🏛 Ulugbek Astronomical Institute of the Uzbek Academy of Sciences

I was a big asset to the team together with whom I could observe the sky, collect, and analyze the astronomical data.
